2 passenger elevators, 2 manual-operation freight elevators, 24/7 accessibility to all elevators

BATHROOMS

All floors have two sets of ADA compliant men's and women's bathrooms

HVAC

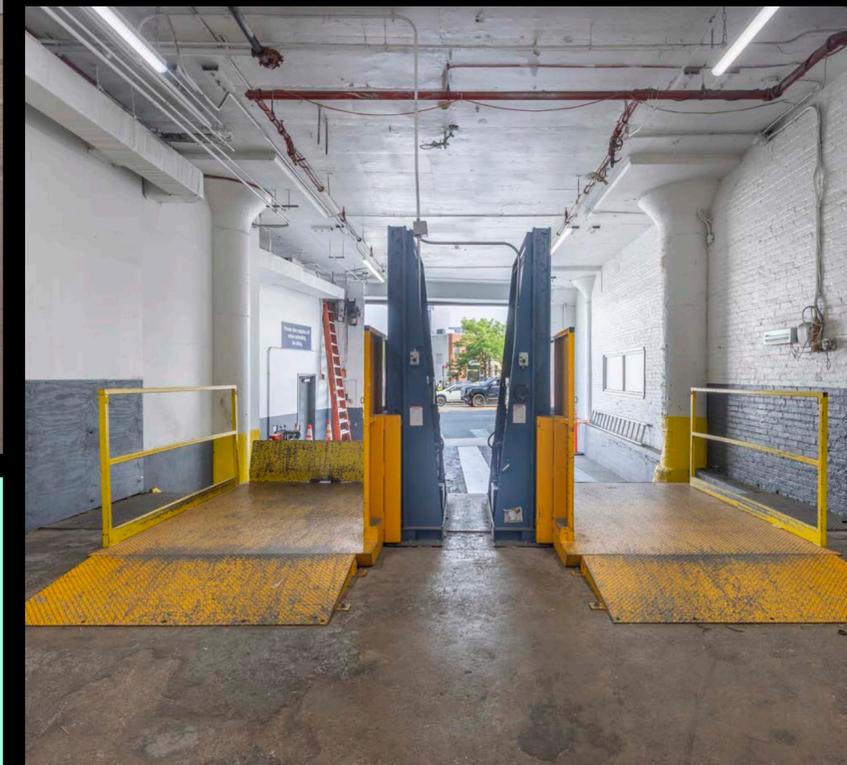

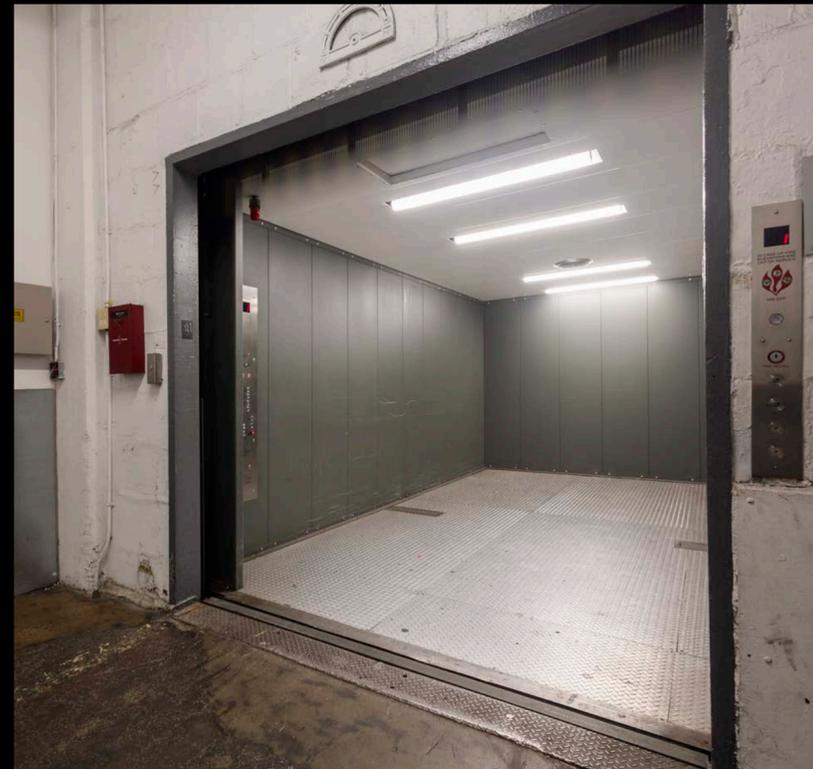

Tenants are responsible for providing and maintaining their air conditioning and mechanical ventilation systems. Most tenant spaces are cooled by small capacity, split DX system air conditioners, where the condensers exhaust through wall vents. Tenants can control their own climate and their units are separately sub-metered

HEATING

Base building heat through a central oil-fueled steam boiler and associated distribution components. Tenants can turn individual radiators on or off

ELECTRICAL CAPACITY

3 major switch rooms on site rated, 2,500 amps (2 panels) and 3,000 amps (1 panel), 240/480 volts, Private submeters track individual tenant power usage, Sub-power and lighting panels between 200 and 400 amps, 120/208 volt power receptacles and lighting fixtures

ORIGINALLY BUILT IN 1919 AS THE
